Appa Rao** for making us available all the required assistance and his support and inspiration to carry out this Skill Oriented Course Web Application / Project in the Institute.

I am thankful to the teaching and non-teaching staff of CSE department for their direct as well as indirect help in my Skill Oriented Course Web Application / Project.

I am elated to avail my selves to this opportunity to express my deep sense of gratitude to my parents.

FIT AND FAB GYM

Abstract

(Sample abstract) A snake game is an arcade maze game. The Snake game is a singleplayer game where the player must get a food that pop out in the board window. The game is very crucial and fun in every aspect, the player must get a food to receive a score. This game is played in a simple window with background where it contains the snake head and the food. The player can move the snake head via keyboard bindings. This is a score based game in which the player must attain more score from time to time. It is considered to be a skillful game and has popularized among people for generations. The snake in the Snake game is controlled using the four direction buttons relative to the direction it is headed in. The player's objective in the game is to achieve maximum points as possible by collecting food or fruits and protect the snake. The player loses once the snake hits the wall or hits itself. This is very easy in the early phase of the game but is increasingly more difficult as the length of the snake grows.
